**Notes on cultural rights, the fight for democracy and public libraries**

(UCLG = United Cities and Local Governments)

- **EU: Culture and Democracy: The Evidence**

“In the Work Plan for Culture 2023-2026, we put a specific focus on the link between culture and democracy, and we want to bring policy makers and stakeholders together to jointly work towards the concept of cultural citizenship in the EU. This report is part of the process.”

**Action 11. We will protect and promote culture and sport as integral components of sustainable development.**

30. We recognize that culture as well as sport offer individuals and communities a strong sense of identity and foster social cohesion. We also recognize that sport can contribute to individuals' and communities' health and well-being. Culture as well as sport therefore are important enablers of sustainable development. We decide to:

(a) Ensure that culture as well as sport can contribute to more effective, inclusive, equitable and sustainable development, and integrate culture into economic, social and environmental development policies and strategies and ensure adequate public investment in the protection and promotion of culture;

(b) Encourage strengthened international cooperation on the return or restitution of cultural properties of spiritual, ancestral, historical and cultural value to countries of origin, including but not limited to objects of art, monuments, museum pieces, manuscripts and documents, and strongly encourage relevant private entities to similarly engage, including through bilateral dialogue and with the assistance of multilateral mechanisms, as appropriate;

(c) Promote and support intercultural and interreligious dialogue to strengthen social cohesion and contribute to sustainable development.
